B.S. Industrial Design, minor in Japanese Language and Culture  
2017 - 2021

### Hongik University, Seoul, South Korea

B.S. Industrial Design  
Study abroad; 2021

## experience

### Assistant Language Teacher

Mutsu City, Aomori, Japan  
2024 - Ongoing

A year of personal development during which I have grown language skills, worked with diverse teams, and fostered cultural exchange in a local community.

- Instructed English, science, and art classes at five elementary and junior high schools in rural Japan.
- Organized and participated in cultural outreach programs and events aimed at introducing foreign cultures and generating interest in them.

### Product Designer + 3D Designer

Razor USA LLC  
Cerritos, California 2022 - 2024

As a member of the Product Development team, I designed, modeled, rendered, and prototyped electric bicycles, scooters, and ride-ons.

- Lead design and development of two products:
  - "Strawberry Banana" special edition A-Kick Scooter
  - "Kick 2 Glow" Light-up Kick Scooter
- Provided 3D product visualization, CAD modeling, animation, and packaging design to develop new products and brands as well as refresh existing offerings.
- Collaborated with manufacturing partners, engineers, and marketing teams to bring designs to life through production.

### 3D Designer

Trinity Packaging Solutions  
Newport Beach, California 2023 (Contract)

As a contract 3D Designer, I supported online marketing by producing assets for a cohesive, on-brand catalog.

- CAD modeled, rendered, and visualized products to contribute to an online catalog of thousands of packaging materials.
- Worked independently with minimal oversight. I self-directed to ensure deliverables were completed in a timely manner in order of importance.
